Tasman Oil Tools offer a range of OEM Security Custom & Standard fixed diameter Hole Openers. Our Hole Openers can be dressed with cutters to suit soft, medium & hard formations. All Hole Openers are manufactured with box down connection allowing the tool to be run as part of your bottom hole assembly.

As part of our rental fleet our Security Custom & Standard fixed diameter Hole Openers are inspected and comply to T.H. Hill DS1 3rd Edition™ and maintained to API and manufacturers guidelines.

All Hole Openers are fitted with customer specified jets prior to rental.
