

Product Information Sheet

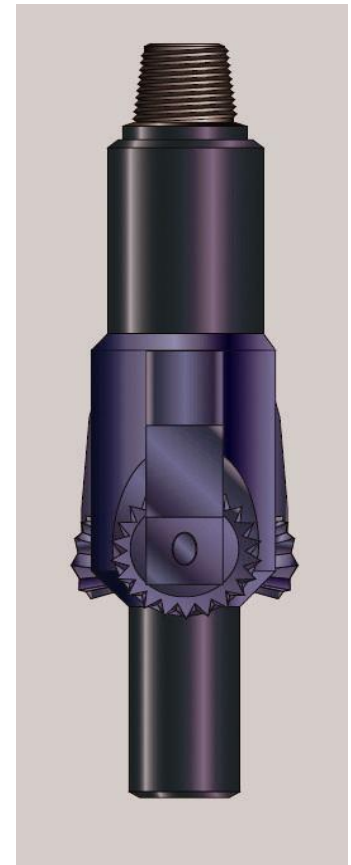

Security Custom Hole Openers

Fixed diameter Hole Openers with a range up to 56" Hole Size

Tasman Oil Tools offer a range of OEM Security Custom & Standard fixed diameter Hole Openers. Security Custom Hole Openers are designed to handle big hole drilling projects, offshore well conductor holes, and other drilling needs where speed and reliability are important.

Security Custom Hole Opener Range			
Hole Size	Min Pilot Hole	Body OD	No. of Cutters
26"	14.3/4"	10"	4
36"	17.1/2"	10"	4
42"	22"	10"	4
56"	26"	10"	8

Advantages:

- Quick-change hole opener cutter assemblies to allow fast easy changes on the rig floor using hand tools
- High-velocity jet circulation for efficient hole cleaning and longer cutter life
- Nail-Lock retained nozzles can be changed quickly and easily for matching particular pump capacities or hydraulic programs

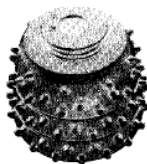

Cutters Types:

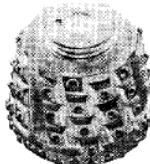

Type S:
Tooth type for
soft formations.

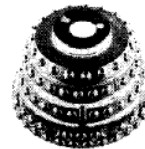

Type MG:
Tooth type for
medium to hard
formations.
Carbide inserts
for gage protection.

Type S6:
Insert type for
soft to medium
formations.

Type H8:
